Professional Summary

Full-Stack Developer specializing in Next.js, TypeScript, and the MERN stack, with a proven track record of building scalable, revenue-generating commercial platforms. Combines expertise in secure RESTful API design and database management with a passion for mentoring aspiring software engineers as a technical programming instructor.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python, HTML5, CSS3, C/C++
Backend: RESTful APIs, Node.js, Express, Firebase, Supabase, OAuth2.0, JWT, Stripe
Frontend: React.js, Next.js, Tailwind CSS, TanStack Query, Axios
Databases: MongoDB, MySQL, PostgreSQL, Prisma
Tools & Environments: Git, GitHub, Cursor, Antigravity, Postman

Projects

ElaRose – Clothing Brand E-commerce Platform — [🔗 Live](#) Oct 2025 – Nov 2025

Next.js, Node.js, Express.js, MongoDB, Tailwind CSS, Firebase, Cloudinary, Resend

- Constructed a full-stack commercial platform for a clothing brand, boosting overall sales by 30% and expanding the customer base to drive an average of BDT 50,000 in monthly revenue through an optimized catalog and seamless Cash on Delivery (COD) flow.
- Architected a custom admin dashboard and CRM using Node.js and MongoDB, drastically reducing the need for manual moderation by centralizing real-time sales analytics, user activity monitoring, and dynamic inventory management.
- Integrated Firebase for secure user authentication, Cloudinary for high-performance product image streaming, and Resend for automated transactional email workflows.

Spread Fast – Courier Delivery and Management System — [🔗 Live](#) — [🔗 GitHub](#) Jun 2026

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Firebase, Stripe API, TanStack Query

- Created a serverless full-stack logistics platform, enabling seamless parcel booking, smart rider dispatching, and real-time visual tracking across a multi-stage delivery pipeline.
- Established secure Role-Based Access Control (RBAC) utilizing the Firebase Admin SDK and custom JWT middleware to manage distinct, secure workflows for customers, delivery riders, and system administrators.
- Incorporated Stripe for secure checkout sessions with automated cryptographic tracking ID generation, leveraging TanStack Query to execute optimistic UI updates and instantaneous data synchronization without page reloads.

Basha Khuji – Property Rental Management API — [🔗 GitHub](#) July 2026

TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Stripe API

- Engineered a strongly-typed RESTful API utilizing Node.js, Express, and TypeScript, backed by a PostgreSQL database managed via Prisma ORM for complex relational modeling and transactional integrity.
- Enforced strict resource ownership and distinct business logic validations through JSON Web Token (JWT) authentication and advanced Role-Based Access Control (RBAC) across Tenant, Landlord, and Admin roles.
- Formulated dynamic API endpoints supporting complex query parameters (multi-dimensional filtering, pagination, and temporal sorting) alongside robust soft-deletion mechanisms to preserve historical data integrity.

Professional Experience

Web Development Instructor Mar 2026 – Present

CUB Skill Development Program

- Planned and delivered a comprehensive full-stack curriculum to a cohort of 12 students, instructing them in JavaScript frameworks, responsive frontend design, and backend API architecture.
- Mentored students through the complete SDLC, conducting over 8 hands-on code reviews and guiding the successful deployment of 8 functional web applications.

Competitive Programming Instructor Jan 2023 – Oct 2023

Canadian University of Bangladesh

- Instructed 35 freshman students across two semesters in foundational C/C++, crafting hands-on curricula focused on core algorithmic problem-solving and logic building.
- Mentored and coached 10 student teams across 2 live programming contests, providing strategic guidance on algorithm optimization, real-time debugging, and competitive tactics.

Education

B.Sc. in Computer Science and Engineering Expected graduation: July 2026

Canadian University of Bangladesh, Dhaka
